

OM - Bevel Helical

Features:

- Ratios from 8/1 up to 550/1
- A choice of mounting options
- Standard IEC flange and shaft motor input
- 0.09kw up to 90kw
- Robust and durable design
- Available ATEX certified

The OM-Bevel Helical gearbox from STM features a very rigid monolithic structure making it suitable for high intensity applications where heavy loads are encountered.

Ratios on offer range from 8/1 up to 550/1 all from the same gearbox housing. As with all gearboxes from STM, the OM series offers standard IEC motor inputs and numerous mounting options.

Through the stocking of component parts for these gearboxes we are able to offer the OM range from stock. This allows for the quick procurement of spares and repairs should the need arise.
